| 2 - 2 Recommendations: | | |
|--|--|--|
| - Operating range: -40 °C to +100 °C | | |
| Dropping or exerting mechanical shock will cause breakage, take care in handling Thinly spread thermally conductive grease should be placed between module and heat exchanger Surface deviation from flatness should be kept under 0.02mm For optimum reliability and performance it is recommended that the module be utilised <0.7 I max | | |
